

## Playing from uneven lies

Ball **ABOVE** your feet:

- Adjust your weight more on the balls of your feet.
- Choke down on your club.
- Take a few practice swings to make sure the club does not hit the ground behind the ball.
- Aim more to the **RIGHT** of your intended target because the ball will tend to pull to the left off this lie.
- Make a smooth swing this may require you to take more club to cover the needed distance.

Ball **BELOW** your feet:

- Adjust your weight more towards your heels.
- Grip the club as normal.
- Stand a little closer to the golf ball to be sure to reach it with the club head.
- Sit a little deeper in your posture (more knee bend).
- Aim more to the **LEFT** of your intended target because the golf ball will tend to leak out to the right off this lie.
